We shall probably employ some well-known lawyer to prepare the evidence and present it in the form of a prosecution, although the presumption will be of course, that the various members of the House whose names have been brought into this, are above the properties of the evidence develops any reproach. If the evidence develops any additional charges we shall sift these to the bottom, our idea being to lay before the people of the country all the facts that can be brought to bear, as far as they may involve members of the House."
